Here it is the Electron Handicap System [EHCS] Developed by Greg Paul it is not perfect but dam near! Take the first place winner Judy. Go to her best total which is 27 this gives her 4th on line add 100 to 4 = 104 subtract her handicap 5.3 from 104 = 98.7 this makes her the lowest score and first place.

Pretty hectic day with gusts to 20 plus knots knocking a few boats off the course and going into the bank. All skippers observed the rules which contributed in making it an excellent days sailing. Don set a very fair course which made for clean trouble free starts. It was a tad fluky at the top mark sometimes with no wind for the lead boat to get around but giving the tail enders a chance. Well done Judy with your new boat and also to Colin whose handicap I have had to hammer after last weeks win. The competition is hotting up!
